

CONNECTING STAFF

PROFESSIONAL SUPPORT WORKERS

We provide day-to-day support to children, young people and adults who have social, physical, intellectual or mental health needs, with a focus on achieving personal goals.

Connecting Staff recognises the impact of social and structural forces and tailor support accordingly. In turn, this breaks down barriers creating future opportunities.

How we can support you

Our motivating support workers assist participants with a range of support. We focus on establishing a great routine which works for the individual and engage in local activities that help improve social skills.
