What is MyBurrow?

MyBurrow is designed to be freely accessible for child-controlled, continuous sensory feedback. Unlike mobile devices MyBurrow remains fixed onto compatible surfaces with extra wide hook Velcro. Suitable loop pile carpets create a firm, quick release attachment. There is no need to manipulate limbs in order to enter or exit this device!

"Amazing product. The students took to it instantly!"
Sarah Capra, Teacher

Parents, teachers, therapists & clinicians have reported major improvement in behaviour including:

-  Reduction in sensory excitability
-  Increased vocalisations & appropriate use of language
-  Reduction in the manifestation of anxiety related behaviours
-  Heightened attention to task

MyBurrow comes highly recommended by:

Physiotherapists

to develop movement skills, coordination, strength etc.

Occupational therapists

to develop body awareness, position & movement in space & support emotional regulation.

Speech therapists

to develop concepts, ideas & words to suit & expand play themes.

Teachers

to intergrate therapy, social & communication goals with the curriculum.

"My children playing in the same space safely is something I did not think would happen, but MyBurrow gives us that!"
Despina Mathiou, Parent

Safe

Child initiated & controlled
Quick release safety feature

Tough

Kid proof durability
Group stretch capacity

Flexible

Adjustable panel tension
Easy care storage

"This Stretchy Safe Space is great for offering proprioception, resistance & compression during our sessions!"
Rothwell Physiotherapy
