

OUR MEDICAL ALERT SYSTEM SUPPORTS

HEALTHY AGEING AND OUR CUSTOMERS TO LIVE INDEPENDENT & CONNECTED LIVES.

WE'RE NOT JUST AN EMERGENCY RESPONSE SYSTEM; WE'RE A SUPPORT NETWORK AVAILABLE AT ALL TIMES.

- It gives clients the freedom and peace of mind to stay independent longer.
- People are not confined to their homes, our Pendant works anywhere in Australia.
- Emergency Safety Monitoring 24 Hours A Day... Every Day.
- Fall down alert: Senses fall or shock with 3D G-Force sensor. When a fall is detected it will automatically call our 24 hr call centre as well as SMS alert and GPS positioning within 2.5 metres.
- Fall detection: safetwear device will automatically alert the centre if it detects a fall. This ensures that even if you are unable to speak or to move your fingers, someone will be in contact with you and proceeding with emergency response protocols.
- Manual Activation: An alert is activated by pressing the button on the safeTwear device - this automatically connects to the 24/7 care centre and they initiate emergency response procedures.
- Hands-free two way communication, you can clearly speak and listen to calls through the pendant's built-in high quality microphone and speakerphone.
- Pendant is shower & rain proof, comfortable and only weighs the same as three 20c pieces.
- Welfare Checks: The 2 way hands free communication is able to receive an incoming call from a designated mobile telephone number to conduct welfare checks to individual clients.
 - People that are forgetful and may just need reminding to take their medications, or require a simple prompt that it's lunchtime or in warmer months to remain hydrated and drink water.
 - Remind people that they have a medical or social appointment.
 - Simply a form of social support for those that are isolated.
 - Or an alternative way to touch base for those who forget or don't like to use their mobile phones.
 - Easy GPS location for those prone to wandering.

4G Device with voice alerts to further assist customers with accidental activation and maintaining battery levels.

By offering a progressive and alternative form of care this device adds value to your agency's services by:

- Potentially increasing the number of hours of service available to clients out of their existing packages by reducing staffing costs.
- Using GPS locator if clients not home for pre-arranged service.
