

# Functional Capacity Assessments

## Make sure you receive the right supports for right now

BlueSky Mind Studio can help ensure participants have the right level of support to achieve their goals by undertaking a Functional Capacity Assessment with one of our qualified Psychologists.

An up to date Functional Capacity Assessment can help to;

### Improve Support Plans

Get more effective and tailored support with an accurate snapshot of current strengths, challenges and goals

### Identify Additional Services

Identify areas where participants may benefit from additional supports or services not currently funded in their plan

### Monitor Progress

Regular Functional Capacity Assessments can help to monitor participant progress over time, informing future treatments

### Improve Provider Communication

Improve communication with current providers by providing a clear and comprehensive picture current functional capacity

### Enhance Self-Awareness

Empower participants to advocate for their own needs and preferences through a greater understanding of their strengths, challenges, and goals

### Determine Eligibility

A Functional Capacity Assessment can be used as evidence in the application process for a range of disability programs and services
