

Need Assistance To Look After Your Loved One?

At Blue Lotus Care we are a team with a wealth of experience who believe in providing a dedicated and devoted service full of warmth, empathy and compassion to all our clients with special needs.

Blue Lotus Care always take the time to understand a new participant and their individual support needs. We believe this is essential to offer quality support and service value. As the support service provider, it is vital to understand the participant's support needs, goals, aspirations, and any barriers in creating a successful pathway through the supports towards ndis goals. In collaboration with the participant and any plan nominee/s, Blue Lotus Care will Identify and develop a road map of support that aligns with the ndis plan objectives. Together in co-design, we would complete a support and activity plan (Care Plan), which will form the basis of the support program. This will be modelled around the participant's focus ndis goals, individual support needs, interests, and aspirations. The support and activity plan will provide the participant with structure around their supports and expectations on their support service delivery. It is designed to support learning new skills, things the participant wants to try, aligning goals, and developing independence and life skills. Also enjoying the journey and the experience as a trusted team.
